SUMMARY

CTO and full-stack engineer with 5+ years building global marketplace platforms, mobile apps, and AI agent systems. At Guestlist, I own the architecture and delivery of a nightlife and experiences marketplace built for many countries: live in Bali with 110+ partner businesses and 30,000+ visitors, launching in Las Vegas in October 2026, with more countries on the roadmap. I stay hands-on in TypeScript, Flutter, and cloud infrastructure while leading cross-functional teams toward business goals.

WORK EXPERIENCE

New Directions Success (Guestlist), Bali, Indonesia — Mar 2025 – Present
Chief Technology Officer

- Own technology strategy and delivery for Guestlist, a nightlife and experiences marketplace built for many countries: live in Bali, launching in Las Vegas in October 2026.
- Architect and ship the full product line: customer mobile app, partner app, affiliate dashboard, global web platform, and back-office, on a scalable backend.
- Lead the Las Vegas expansion (launching Oct 2026): imported 1,700+ events and 45+ venues into staging through an event-data agent, with human approval before anything goes live.
- Cut back-office build time from ~11 min to ~2.5 min; moved production to a new domain with zero downtime.
- Operate VPS infrastructure with monitoring and alerting (Prometheus, Grafana, Loki), and run AI agents, each with a named human owner: Agent Board (AI proposes venue data with sources, a person approves), error alerting, IT automation, ops briefings, event-data import, and social analytics; a WhatsApp customer-support agent is in testing.

Jobseeker, Bali, Indonesia — Sep 2024 – Mar 2025
Senior Mobile Engineer

- Led Flutter development of the Jobseeker and Jobseeker Partners apps, published on Google Play.
- Introduced structured state management (BLoC, GetX, Provider) to improve maintainability and release consistency.
- Evaluated new Flutter technology for the team and resolved backend-related issues quickly, per colleague recommendations.

BTW Edutech, Bali, Indonesia — Aug 2022 – Aug 2024
Tech Lead Mobile Engineer

- Led and mentored a mobile team delivering applications across iOS, Android, Web, and Desktop.
- Architected and shipped BTW Edutech, Smart BTW, and Teacher Payroll with a focus on performance and maintainability.
- Worked with product, design, and business teams to align releases with company objectives.

Freelance Full-Stack Engineer, Bali, Indonesia — Dec 2019 – Present

- Delivered web and mobile products for clients in tourism, retail, inventory, and finance: 10+ client platforms, 10+ full-stack systems, and 40+ Web3 sites (20+ live).
- Built database-driven applications with third-party API integrations, responsive interfaces, and practical architecture.

EDUCATION

Indonesian Institute of Business and Technology (INSTIKI), Bali, Indonesia — Aug 2019 – Feb 2023
Bachelor of Information Technology (GPA 3.62/4.00)

- Campus debate competition winner.

LEADERSHIP

President, Student Executive Board (BEM), INSTIKI Aug 2021 – Aug 2022

- Led a 114-member student organization and executed 40+ programs across multiple divisions.
